regulators	11/55
relay ladder diagrams	10/39, 10/51
reliability	7/09, 7/41, 7/53, 8/07, 9/27, 9/101, 9/111, 9/119, 9/27
relief valves	1/51
remote area monitoring	12/9
research in instrumentation	2/73
resistance temperature detectors	6/39
retrofit	9/87, 9/97
risk management	12/27
safety monitoring	1/33, 12/9
safety valves	1/51
safety	5/09, 7/35, 8/07, 8/27, 9/27, 9/61, 9/119, 10/31, 12/27, 12/33, 12/43
sample conditioning	6/51
sampling systems	3/51
segmental wedge flowmeters	11/59
self tuning	9/259
self-tuning controllers	5/45
sensors	6/45
serial communication I/O systems	2/49
shared resources	7/47
signal levels	1/09
slurry flow measurement	11/59
soft switches	4/75
software develpment	2/39
software	9/11, 10/39
solid-state analyzers	6/55
solid-state sensors	6/45
specifications	3/61
specification	2/33
split ranging valves	10/57
stand-alone front-end	2/49
standards	12/71
Stanley, Marland	1/93
state transition diagrams	10/51
steam flow measurement	12/49
surface contamination	9/91
surface inspection	9/83
surge control	3/55
technician training	10/89
technology transfer	9/119
temperature control	10/57
temperature profile determination	9/83
temperature sensors	6/39
temperature shock	6/09
thermal conductivity	9/91
thermal shock	6/09
thermistors	6/39
thermocouples	6/39
Three Mile Island	1/33, 7/35
throttling valves	3/55
TMI	1/33, 7/35
touch screens	4/75
touchpads	4/69
toxic gas monitoring	6/55
transducers	6/45
transmitters	1/43
troubleshooting	3/55, 9/97, 11/49
turbidimeters	5/51
unit controllers	3/41
upgrading instrumentation	9/97
upgrading	9/87
user interfaces	4/69, 4/75
utility control	9/87
valve specification	3/55
valves	1/43, 1/51
variable-area orifice meters	12/49
vendors	2/33
Venturi flowmeters	11/59, 11/41
vessel integrity	6/09, 8/07
video consoles	4/55
viscosity	11/09
vortex flowmeters	1/57, 11/41, 12/49
wastewater neutralization	5/45
